

SUCCESS STORY – POOJABEN BHARATBHAI DABHI

Poojaben Bharatbhai Dabhi, a resident of Verad village in Jamnagar district, transformed her determination into success through skill development. After marriage, she chose not to limit herself to household responsibilities but aspired to become financially independent and support her family.

To achieve this dream, she enrolled in the **Technical Training (CNC Programming)** course at the **InShakti Foundation Technical Training Centre**, operated under the **Jamnagar Factory Owner's Association** with the support of **Nayra Energy's CSR Initiative**. With constant encouragement from her family, especially her mother-in-law, Poojaben completed her training with dedication, discipline, and a strong desire to learn.

Within just two months of training, she impressed everyone with her technical skills and was selected by **all six companies** that participated in the Job Fair held on **7 July 2026**. While continuing her training, she also joined **Ashirwad International, Dared, Jamnagar**, as a part-time employee to gain practical industrial experience

Recognizing her confidence and ability, the company entrusted her with operating a highly critical automatic CNC machine a responsibility usually reserved for experienced professionals. Poojaben successfully handled the machine and completed an entire production order with exceptional accuracy, earning appreciation from the company management.

Today, Poojaben's journey stands as an inspiring example of how quality technical training, family support, and determination can transform lives. Her success has not only strengthened her confidence but has also inspired her family to dream of establishing their own CNC-based business in the future.

"Poojaben's story proves that when skills meet determination, success becomes inevitable."
